

ZOBEDA DEWAN

FRONTEND DEVELOPER

Ontario, Canada | +1 647 236 4229 | dewan.zobeda@gmail.com | [linkedin.com/in/zobeda-dewan](https://www.linkedin.com/in/zobeda-dewan)

PROFILE SUMMARY

Frontend Developer specializing in React, TypeScript, and Tailwind CSS, focused on building scalable, high-performance, and accessible web applications across SaaS, healthcare, workforce management, and digital marketing domains. Strong experience in developing reusable UI components, design systems, and responsive interfaces, with a focus on performance optimization and user experience. Experience working with RESTful APIs and exposure to backend services and databases (Node.js, SQL, MongoDB, AWS) while contributing to data-driven frontend features in Agile environments.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, HTML5, CSS3, Redux Toolkit, Context API, React Hooks, TanStack Query, React Hook Form, React Router

Backend: Node.js, Express.js, RESTful APIs, GPT-4 API

Database: MongoDB, MySQL

Testing: Playwright, Cypress, Functional Testing

Development Tools: Vite, Webpack, Git, GitHub, Docker, Axios, Zod

Cloud: AWS

Workflow & Methods: WCAG 2.1, AODA, Agile, Jira, Responsive Design, Cross-Browser Compatibility

WORK EXPERIENCE

Frontend Developer

44 North Digital Marketing | Toronto, Canada | Jan 2022 – Dec 2025

- Developed responsive React applications for 10,000+ users using React Hooks, Context API, and Redux Toolkit to eliminate prop-drilling and streamline data flow across 15+ major HR/operations features.
- Implemented TanStack Query for server-state caching, reducing redundant API calls by 30% and dashboard latency by 25%; configured Vite and Webpack code-splitting to cut application load times by 30%.
- Developed GPT-4-powered search widgets and AI compliance checks that reduced retrieval time by 60%, while building multi-step forms using React Hook Form and Zod to minimize user input errors.
- Designed real-time dashboards with Axios-driven REST APIs and data export capabilities, improving decision-making efficiency by 40% and saving stakeholders 20+ hours per month.
- Migrated the test suite from Cypress to Playwright, achieving 3x faster cross-browser execution and enforcing consistent code quality through ESLint, Prettier, and automated CI/CD pipelines.
- **Tech Stack:** React.js, TypeScript, Redux Toolkit, TanStack Query, React Hook Form, Zod, Axios, Vite, Webpack, Playwright, GPT-4 API

Software Engineer

Ontario Ministry of Health | Toronto, Canada | Jul 2021 – Dec 2021

- Optimized regional patient portals using React Hooks and React Router, boosting application speed by 30% and delivering smooth multi-page navigation for 15,000+ healthcare professionals in Ontario.
- Integrated Axios for reliable REST API communication with the Node/Express backend, resolving critical data synchronization bugs across 14 updates and ensuring dependable patient data retrieval.
- Upgraded legacy portal features to meet AODA and WCAG 2.1 AA compliance, fixing screen-reader and navigation bugs to guarantee full accessibility.
- **Tech Stack:** React.js, React Hooks, React Router, Axios, Node.js, Express.js, MongoDB

Web Developer

Canadian Centre for Information and Knowledge | Toronto, Canada | Jan 2019 – Jun 2021

- Developed interactive landing pages and dynamic UI layouts using React to transform wireframes into highly responsive designs, boosting user engagement by 35%.
- Optimized client-side routing and checkout flows with React Router for an e-commerce platform, streamlining the user journey and reducing cart abandonment rates.
- Integrated Axios with a Node/Express backend while optimizing MongoDB query patterns, using lazy loading and code-splitting to accelerate page speeds and improve real-time data sync.
- **Tech Stack:** *React.js, React Router, Axios, Node.js, Express.js, MongoDB*

Software Engineer

Kraken Digital Asset Exchange | Halifax, Canada | Apr 2018 – Nov 2018

- Maintained and improved frontend applications by diagnosing and resolving UI bugs, ensuring responsive layouts, cross-browser compatibility, and a consistent user experience across releases.
- Collaborated with developers and QA teams during Agile sprints to validate bug fixes and newly developed features, performing functional testing and supporting the delivery of stable software releases.
- **Tech Stack:** HTML5, CSS3, JavaScript (ES6+), Figma, Git, Responsive Design, Cross-Browser Compatibility, Functional Testing, Agile

IT Specialist

IBM Canada | Halifax, Canada | Feb 2017 – Nov 2017

- Developed responsive HTML5/CSS3 email newsletters and web interface enhancements from Figma designs for an oil and gas client, ensuring cross-browser compatibility, accessibility, and consistent user experience.
- Created test plans, test strategies, and automated/manual test scripts for a large-scale banking migration project, executing end-to-end testing, identifying critical defects, and collaborating with cross-functional teams to ensure successful production releases.
- **Tech Stack:** HTML5, CSS3, JavaScript, Figma, REST APIs, MySQL, Jira, HP ALM, Test Planning, Defect Tracking, Agile

EDUCATION

M.Sc. in Computer Science

Memorial University of Newfoundland, St. John's, NL, Canada | Sep 2014 – Sep 2016
